**Event Description and Photographs:-**

An essay competition on Global Warming was carried out in the premises of ITI Ramban on 17-02-2023 under Azadi Ka Amrit Mahotsav (AKAM) by Superintendent of ITI Ramban Sh. Baldev Raj and the Vocational Instructors along with the trainees of different trades. In this programme nearly fifty five (55) trainees participated and performed the activity with full dedication and enthusiasm.

Global warming is the long-term warming of the planet's overall temperature. Though this warming trend has been going on for a long time, its pace has significantly increased in the last hundred years due to the burning of fossil fuels. As the human population has increased, so has the volume of fossil fuels burned. Fossil fuels include coal, oil, and natural gas, and burning them causes what is known as the "greenhouse effect" in Earth's atmosphere. Global warming causes climate change, which poses a serious threat to life on Earth in the forms of widespread flooding and extreme weather.
