Trainees Participation:	25 No's.
Mode:	Offline

Event Description and Photograph:-

Discussion on Water Conservation was held at ITI Ramban on 06-03-2023 under Azadi Ka Amrit Mahotsav (AKAM) by Vocational Instructors along with the trainees of COPA Trade. In this discussion nearly twenty five (25) students participated and performed the activity with full dedication and enthusiasm.

In this discussion the faculty members and trainees discussed the important of Water. Water is the most critical asset. It is a fundamental element for every life on Earth, may it be flora or fauna. Without water, no life can survive, and Earth will be as dry as a rock. Water is additionally fundamental for purposes of irrigation and essential ordinary works. Today, we are wasting water without realizing the importance of it. Water in social events, programs, and festivities are highly wasted. In houses likewise, water is wasted each day. We have a terrible habit of keeping the tap running while we brush, shave, wash, or do some other everyday action. We take a negligible attempt to spare water. It is currently an ideal opportunity to make a full move for protecting water and sparing it from annihilation. Conservation of water is the only solution for sustenance. It has become mandatory that we must value every drop of water and avoid wastage at home, schools, factories and industries. Adopting the policy of Refuse, Recycle and Reuse will help in cutting down water consumption. Recycled water can be used to water plants. Rainwater harvesting will help us save for the rainy day, hence making better use of the resources.
